November 9th-11th - A strong, cold and wet storm system brought the second blast of winter weather to much of the Beehive State, especially Northern and Central Utah. The first burst of snow with the cold front was heavy and wet, downing trees, causing power outages, and causing numerous traffic accidents up and down the Wasatch Front. Tree damage was most substantial over Salt Lake and Utah counties, with dozens of trees or large branches reported down. Many of these downed trees were responsible for the power outages, as they took power lines down with them. As the colder air aloft moved into the state, lake effect snow kicked in east and southeast of the Great Salt Lake, dropping very heavy snow across portions of Salt Lake and Davis counties, and also the ski resorts of the Cottonwood Canyons. The final snow totals with this storm were quite impressive, including 54 inches at Alta UDOT, 51 inches at Snowbird, 32 inches on the Bountiful Bench, 30 inches in Summit Park, 28 inches in Upper Millcreek, and 25 inches in Cottonwood Heights. The storm total at the Salt Lake City International Airport was 15.2 inches, making it the third highest November 3-day storm snow total on record. The top 2 storms are 20.3 and 20.2 inches, both set in November of 1908. The storm also produced a funnel cloud near Utah Lake.

Below: Heavy, wet snow fell on trees that had yet to shed their leaves. This led to downed trees & branches.

Provo, Utah - Photo Courtesy KSL

Above Left: Mosaic of heavy snowfall in Northern & Central Utah, including tree damage in Salt Lake City.

November 30th - A Pacific cold front brought valley rain and mountain snow to Northern and Central Utah late in the day. The heaviest rain fell across the Northern Wasatch Front, Cache Valley, and Wasatch Mountain Valleys. Snow was confined to areas above the 6000 foot level, and even there amounts were fairly light, generally ranging from 1 to 4 inches. Gusty winds also developed ahead of the cold front.

Temperature & Precipitation Records For the Month of November:

Nov 6th - Two locations tied record high maximum temperatures, Escalante 72 (72/2009) and Kanab 78 (78/1934).

Nov 8th - Wendover tied their record high maximum temperature with 70 (70/1980).

Nov 9th - Two spots set record high minimums...Cedar City Airport 45 (43/1991) and Milford 48 (46/2002).

Nov 9th - The Salt Lake City International Airport recorded 1.07 inches of precipitation. That broke the Salt Lake City daily record of 1.04 inches set way back in 1896.

Nov 9th - One day after tying a record high maximum temperature, Wendover tied their record low maximum with 39 (39/2011).

Nov 10th - Four locations set record low maximum temperatures...Fillmore 33 (33/2000), Manti 29 (31/2010), Provo BYU 35 (35/1924), and Richfield 37 (37/1946).

Nov 10th - The Salt Lake City International Airport recorded 8.5 inches of snowfall. That broke the Salt Lake City daily record of 8.0 inches set way back in 1886.

Nov 11th - Record low minimums were set at Bullfrog 26 (29/1975), Capitol Reef NP 22 (22/2000), and Milford 4 (4/1935). Also, 6 locations reported record low maximums...Alpine 30 (32/2000), Alta 15 (19/2000), Manti 24 (31/2000), Milford 29 (29/1978), Spanish Fork 32 (32/2000), Utah Test Range 36 (37/2000).

Nov 12th - Four spots set record low minimum temperatures...Bountiful-Val Verda 18 (18/2000), Grantsville 20 (20/2000), Price 11 (13/2000), and Spanish Fork 10 (15/1975). Fillmore recorded a record low maximum with a high of 26 (31/1916).

Nov 14th - Bullfrog broke their record low minimum with a low of 26 (27/2000).
